**Furniture for
your dental clinic**

by  angelus

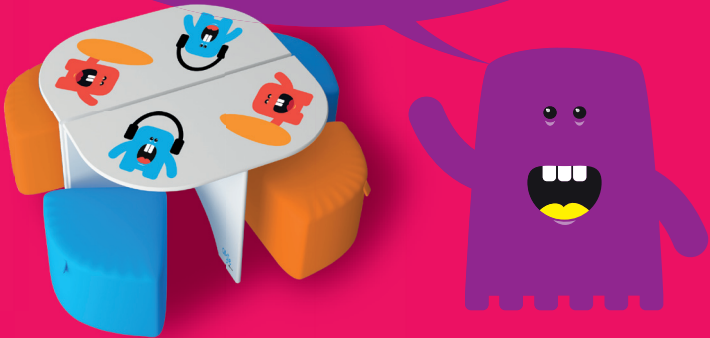

Furniture 1

Technical Description

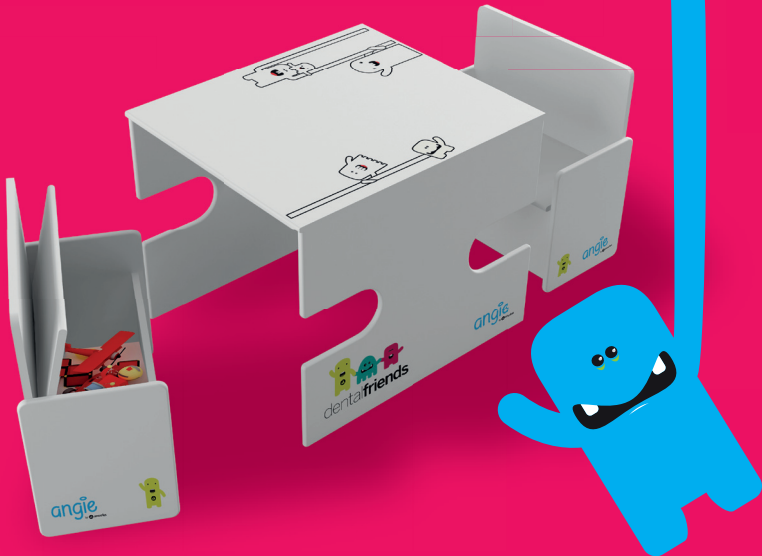

1 half moon-shaped table with glossy surface for drawing and scribbling. Easy to assemble and clean. Light and compact. Two seating poufs (one blue and one orange).

No boredom in the waiting room!
Waiting for the appointment can be an excellent creative stimulus for the child. That is why the Angie wall table and poufs were created, a unit with a table in the shape of a half moon to be placed against the wall or in pairs, forming a table of four places with poufs. And nor is paper required for drawing... the child can write on the furniture itself. Light, compact and entertaining! Your patient will not even remember that (s)he is waiting.

Furniture 2

To scribble and draw!
The Angie table with fitting chest benches was developed to interact with the child's imagination.
A unit with a secret compartment?
And more! In this furniture, the benches are transformed into chests for keeping entertaining objects. The children can draw with powder pen, games can be invented and stories can be told on their surfaces. And we, the Dentralfriends, encourage the fun.

Technical Description

Unit of three parts, namely 2 chest benches and 1 table. Inside the bench there is room to keep books, toys and other objects to entertain the children. Disassemblable parts and narrow packaging. The unit forms a box when it is not being used.

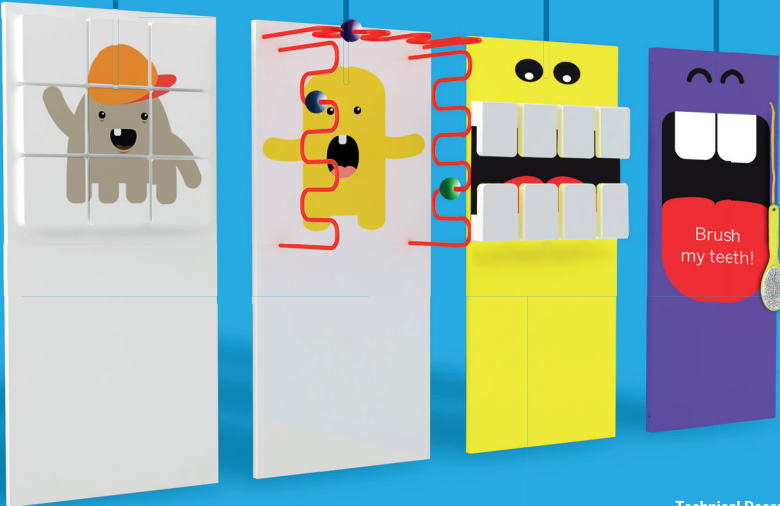

Furniture 3

Having fun to educate!
This is the purpose of the Angie panels. There are 4 different models which can be acquired separately. They serve to entertain the child while waiting and also to educate about the activities related to oral hygiene.

It is possible to have 1 fixed panel and change the games which will be fitted in the lower part...
Teaching your patients to use dental floss and brush their teeth correctly will be much easier with our help.

Technical Description
Individual, decorative and educational models which come with several accessories so that the child interacts with the furniture ("dental floss", pens, eraser in brush format and panel components).
