

## **Testimonials.**

### **Queen Mary's Hospital**

Frognal Avenue, Sidcup, Kent, DA14 6LT

My name is Mel; I am a senior nurse in the oral/maxillofacial, orthodontic and restorative department at Queen Marys in Sidcup UK.

We have 6 of your lab aids and they are wonderful and very quick and easy to use.

I work in the dental department of the hospital. We use the hotplates mainly in our on-site lab and in the orthodontic part of our department. We used to have wax baths which we used for heating up our wax and mirrors. But due to changes and health and safety we moved on to your hotplate units for this and must say I really like them they work very well and are not messy.

We put our mirrors into a bag or paper towel and then place them onto the hot plate so that when we take intraoral photographs pre and post treatment we get an excellent result with the mirror not steaming up at all.

Many thanks

Melanie Foster

Senior Specialist Dental Nurse

Maxillofacial/Oral and Orthodontic Surgery

Kings College Hospital at QMS

### **Ian Buckle - BD/Seminars.**

*"Hi Pat*

*My Practice is Buckle Advanced Dental Care (see below)*

*Our seminar company is at the same address [www.bdseminars.com](http://www.bdseminars.com)*

*I have enjoyed using the Lab-Aid I and it has softened the wax beautifully and evenly. I have a course on this week so will introduce it to our delegates then.*

*Thanks again for letting me try this out*

*Best regards"*

**Walt Richardson- Manager/Technician at Bay View Dental Laboratory, Chesapeake, VA 23320, United States** (Walt is connected to the Dawson Academy USA)

*"Pat,*

*Thank you for the note. Yes staying healthy. Hopefully you are as well. Once I got the right converter the hot plate is awesome. Works very well"*

Simon Miles DIP,  
Royal College of Surgeons (Eng),  
Clinical Dental Technician,  
Smiles Centre, Swindon, UK

"We came across the Lab-Aid I and were impressed by its simplicity – it's a great way to soften dental wax ! We were so impressed we bought a second one a week later as the running cost is very low."

Siobhan Murray BDS,  
Blue Poppy Dental Practice,  
Donegal Town, Ireland.

"We have been using the Lab-Aid for 12 months and it is now an integral part of our process. We find that it is by far the best method of preparing dental wax for use. Dental equipment like this is very economical to run. We also use it for heating mirrors for intraoral photography."
