Bioform Pressure Former

Now includes preset programmes for WHW materials!

Bio-Art Plastvac P7

Competitively priced unit, with some innovative design features. Heating platform can be rotated so both sides of the blank can be heated. Ideal for dual laminates. Accepts round and square blanks. Can be used with or without shot.

Keystone Machine III

Dual chamber vacuum forming unit, economically priced, suitable for most vacuum forming applications.

ProForm

Dual chamber vacuum forming unit, economically priced, suitable for most vacuum forming.

Appliance Boxes

Our plastic appliance boxes are robust and have ventilation holes. They are ideal for shipping and storage of patient appliances.

Our slim line box was specifically designed to take two devices side by side, eg bleach trays, in order that they may be sent via large letter post instead of packet post which can make a considerable saving on postal costs.

Printing Service

We can customize your Appliance boxes and other selected products with your logo etc. as we have an in-house pad printing service. Please contact us for further details.

Dent-Spa

The Dent-Spa is ideal for the patient to store and clean their appliance as it has a sonic action which when combined with cleansing/disinfecting tablets such as our Nitradine tablets will help to keep their device in a healthy pristine condition (see below). Sample tablets are enclosed with each Spa, instructions for use information are printed with your own lab or surgery details unless specified otherwise.

Nitradine Disinfecting & Cleansing Tablets (patented)

All removable dentures, orthodontic appliances, mouthguards are composed of porous materials in which opportunistic and pathogenic micro-organisms (fungi, bacteria and viruses) infiltrate, attach and form biofilm, a 3-dimensional protective matrix in which they build-up.

The active component of Medical Interporous, called NitrAdine™, disinfects and cleans, efficiently removing biofilm formed by Candida albicans which penetrates the pores and cracks of the polymer. It also disinfects and cleans other pathological micro-organisms such as Pseudomonas aeruginosa, St. mutans, St. aureus (including MRSA) and herpes simplex which attach and colonise the denture which leads to painful irritation of the oral cavity (denture stomatitis).

Proform Nightguard
This laminated material was specifically made for night time bruxers. The layering gives the thermoplastic a more abrasion resistant characteristic that will withstand grinding better than traditional soft sheet materials.

Available in:
- 127mm Square
- 120mm Round
- 125mm Round
- 3.00mm sold per blank

NGL
NGL-120
NGL-125

Clear HD For Nightguards And Fluoride trays
These EVA blanks are of the same formula as our bleach tray material which is slightly firmer and more resilient than our mouthguard material.

Available in:
- 127mm Square
- 120mm Round
- 125mm Round
- 2.00mm Pk of 5 Blanks
- 2.00mm Pk of 25 Blanks
- 3.00mm Pk of 5 Blanks
- 3.00mm Pk of 25 Blanks

Bleach Tray Material
These EVA blanks have been specially formulated for the bleaching technique and are slightly firmer and more resilient than our mouthguard material.

Available in:
- 127mm Square
- 120mm Round
- 125mm Round
- 1.00mm Pk of 5 Blanks
- 1.00mm Pk of 25 Blanks
- 1.50mm Pk of 5 Blanks
- 1.50mm Pk of 25 Blanks

VBP
VBP-R120
VBP-R125

Foam Backed Bleach Tray
This Bleaching Laminate is ideally suited for bleach trays, it is only 0.50mm thick once formed over the model. It has a foam liner which absorbs the bleach, thus decreasing the bleaching time for the patient.

Available in:
- 127mm Square
- 120mm Round
- 125mm Round
- Pk of 5 Blanks

Tray and Base Plate Material
These blanks are made from high-impact styrene and are ideal for making custom impression trays and base plates.

Available in:
- 127mm Square Only
- Pks of 25 Blanks White 3.00 mm
- Pks of 25 Blanks White 4.00 mm
- Pks of 25 Blanks Blue 3.75 mm
- Pks of 25 Blanks Pink 2.00 mm
- Pks of 25 Blanks Red 1.50 mm

Coping Material
These polypropylene blanks are excellent for fabricating temporary crowns, bridges and copings. The material gives good definition and will not adhere to acrylics.

Available in:
- 127mm Square
- 120mm Round
- 125mm Round
- 0.50mm Pk of 50 Blanks
- 1.00mm Pk of 50 Blanks

Customise your mouthguards with centri-fuse

It’s as simple as A, B, C

A Make your mouthguard in the conventional way
B Attach your decal design
C Apply centri-fuse

Centri-fuse is supplied in a kit which contains everything you need to start offering this service.

Take advantage of centri-fuse by easily applying your own graphic decals - eliminating unsightly air entrapment - quicker and cheaper than the conventional lamination process.

Centri-fuse

An innovative product that makes the application of decals to mouthguards quicker, easier and more cost effective. The centri-fuse system eliminates the necessity of a second forming. The material is user friendly and adjustments are made in a matter of a few minutes with conventional tools.

Teeth are the part of the body least able to repair themselves

A blow to the face can send shockwaves through the skull, fracturing the front teeth, while other, more severe injuries can result in serious trauma such as concussion, jaw and gum damage.

That’s why athletes who use mouthguards are at less risk of serious injury following a blow to the face. Many sports organisations, clubs and schools have made it compulsory for athletes to use mouthguards, ensuring that they are protected against injury at all times.

Injury reduction and prevention
There are two types of blow to the jaw and lower skull:

Direct
This is a direct frontal blow to the upper jaw which, if unprotected, may result in damage to or loss of teeth, and the possibility of concussion.

Indirect
This is a more common blow to the lower jaw which pushes the lower teeth upwards, bringing them into contact with the upper teeth. Significant damage can be caused including spread of damage to other teeth and damage to the jaw.

Custom-made mouth guards
To reduce or prevent damage from a direct or indirect blow during sports activity, custom-made mouth guards are an essential part of an athlete’s kit.

Your dentist will be happy to make you a custom-made mouthguard, which will fit your mouth exactly and protect your teeth and gums properly. Your dentist will need to take an impression of your mouth and will also recommend type and thickness of mouthguard for the sport or activity you participate in. Your mouthguard will then be made by a qualified dental technician using the very latest technology to ensure a perfect fit.

Why Custom-Made Mouthguards?
If you are considering a new mouthguard, here are a few facts for you to consider when choosing between custom-made and boil-and-bite mouth guards:

- A custom-made mouthguard fits better as it is made from an accurate impression of your mouth
- A custom-made mouthguard can be up to 2.5mm thicker, acting as a shock absorber following impact and spreads the load following a blow
- The contact area of a custom-made mouthguard is greater
- Breathing is not hindered with a custom made mouthguard
- A custom-made mouthguard will not move during activity
- Speech is less impaired than with a boil-and-bite mouthguard
- The British Dental Health Foundation recommends the use of custom-made mouthguards

Please note that no mouthguard can guarantee prevention of injury but a custom-made mouthguard will reduce the likelihood or the extent of damage.
Pack of 4 Syringes
Ref: O1LCBO

Pack of 20 Syringes
Ref: O1LCBO20

Block-out Resin
A low viscosity, blue pigmented light curing block-out resin for blocking out undercuts or creating reservoirs for the bleaching technique.

Order online at whwplastics.com
To order call +44 (0)1482 329154

Adhesive Lettering
Sheet of adhesive backed A-Z lettering suitable for customising mouthguards. Letters approx 6mm in height.
Please note letters must be either laminated or sealed using our centri-fuse kit.

Labelling System complete with tape
Replacement 12 mm x 8 m tape Black on Clear
Replacement 12 mm x 8 m tape White on Clear

Decals For Mouthguards
We supply a wide range of decals that can be used with either our Clear, Coloured or Multi-Coloured blanks. The decals are supplied on a wafer thin water transfer paper that enables you to slide the decal easily into position. Please note these decals must be either laminated or sealed using our centri-fuse kit further details on next page.

Supplied in packs of 12 decals with either black or white backgrounds

Decals Available

Lettering / Labelling System
Ideal for labelling all sorts of items including printing names etc for customising mouthguards.
Label system includes: Printer with large 12 character LCD screen, 9 font styles, built in tape cutter.
Labelling System includes: Printer with large 12 character LCD screen, 9 font styles, built in tape cutter.
Clear Soft Mouthguard Blanks

A soft EVA blank ideal for fabricating Mouthguards, Flouride trays, Bleaching trays & Nightguards.

Thicknesses available 1.00, 1.50, 2.00, 3.00, 4.00, 5.00mm
Blank supplied in either 127mm Square or 120mm & 125mm Round
Supplied in packs of 5 or 25 blanks, except 5mm which is supplied in packs of 5 and 20 blanks

Coloured Mouthguard Blanks

A soft EVA blank ideal for fabricating Mouthguards, in a range of vibrant colours.
Available in a range of thicknesses see colour chart. Blanks supplied in either 127mm Square or 120mm & 125mm Round

Multi-Coloured Striped Mouthguard Blanks

A soft EVA striped blank supplied in any colour combination within our range. So choose your team colours etc and standout from the crowd.
Blank available in 127mm square or 120mm & 125mm round in either 4.00 mm & 5.00 mm thicknesses

Special Designs Mouthguard Blanks

A soft EVA blank with a unique special design.

Note this material is hydroscopic and therefore can absorb moisture if not stored correctly, we recommend you buy no more than three months stock at any one time. Packs of 100 are supplied in foil packs.

Proform Dual Laminate

The dual laminate is a unique combination of two materials formed into a single laminated sheet. It was made especially for use in bruxing cases. The soft liner assures patient comfort, the hard surface assures long-lasting wear. Also, acrylic will bond to the hard surface to allow the dental technician to modify the occlusal surface.

**Wheel Saw**

High quality cutting wheel used for hard sheet resins and dual laminates. The cutting surface is on the edge that contacts the plastic. To be used at slow speeds only.

Ref: 06PWS

**Silicone Release Spray**

Silicone spray eliminates sticking problems, we recommend its use on plaster models, units clamping frame and vacuum bed, it also prevents bonding between certain types of plastic.

Ref: 13VDAL

**Heavy Duty Scissors**

Excellent for bulk trimming of thermoplastics especially soft EVA.

Ref: 01MGS

**Rekrow Gas Torch**

Piezo ignition, butane torch burns for up to hours from one refill, Features an adjustable 1,300 °C pencil flame. Torch is simple to refill from ‘multi-fill’ gas lighter cylinders, obtainable at most tobacconists etc.

Ref: 05PMT

**Grey Silicone Polishers**

Ideal for finishing and polishing most thermoplastics, supplied mounted.

Available in:
- Pack of 5 Mounted Polishers 03BUP8
- Pack of 100 Mounted Polishers 03BUP8L

**Protho- clean**

Synthetic cleaner for high lustre finish, ideal for dentures, orthodontic and mouthguard appliances etc. Just spray on, soak for a second and wipe off with a soft towel. Removes polish and monomers leaving them with a high sheen, improves presentation.

75ml spray

Ref: 04PCS

**Scotch Brite Discs**

These discs are ideal for polishing and finishing mouthguards and other thermoplastic formings.

Available in:
- Brown Coarse HSBCL
- Grey Medium HSBML
- Purple Fine HSFXL
- Orange Extra Fine HSXBFL
- White Non Abrasive HSBSL

**Trimming Burs**

These burs are ideal for trimming thermoplastics as they are non clogging.

- Large Coated Bur For mouthguard Ref: 01BBB
- Carbide Cutter Fine Cross Cut Ref: 0385
- Small Diarit For retainers Ref: 33DTS
- Large Diarit For retainers Ref: 33DTL

**Freeze Spray**

Use this spray immediately after vacuum forming and whilst the vacuum is still switched on, so the spray cools and contracts the plastic rapidly to ensure you achieve an accurate fit to the model. The spray is non flammable.

Ref: 01BFS

**Rekrow Gas Torch**

Piezo ignition, butane torch burns for up to hours from one refill, Features an adjustable 1,300 °C pencil flame. Torch is simple to refill from ‘multi-fill’ gas lighter cylinders, obtainable at most tobacconists etc.
