Forbici tradizionali:

Le forbici chirurgiche, senza alcuna codifica colore di identificazione, realizzate in acciaio ad alto contenuto di carbonio, vantano un elevato grado di durezza Rockwell delle punte taglienti. Questo fa sì che tutte le operazioni vengano eseguite con il minor trauma possibile per il paziente.

Traditional scissors:

The surgical scissors, with no colour coding identification, made of steel with a high carbon content, have an elevated degree of Rockwell hardness in the cutting tips, thus allowing all the procedures to be carried out with as little trauma as possible for the patient.

forbici per gengive con inserti in carburo di tungsteno | gum scissors with tungsten carbide inserts

Forbici carburo di tungsteno:

Le forbici in carburo di tungsteno ad utilizzo chirurgico e parodontale, sono identificate da entrambi i manici dorati, codifica internazionale che denota l'apporto di inserti di carburo di tungsteno su entrambe le lame. Si distinguono per la presa sicura della gengiva, precisione nel taglio e lunga durata nel tempo.

Tungsten-carbide scissors:

Tungsten-carbide scissors for surgical and periodontal use are characterized by the gilding of both handles, which by international coding, indicates the presence of tungsten-carbide inserts on both blades.

Distinguished features of these scissors are the safe gum grip, the precise incision and long lasting performance.

forbici per gengive Super Cut | Super Cut gum scissors

Forbici Super-cut:

Particolarmente innovative, le forbici della serie Super-cut vengono identificate dalla doratura di un solo manico. Il particolare disegno delle punte, con una delle due lame affilata a rasoio, permette di eseguire tagli molto precisi dei tessuti. La lama dentellata per un miglior trattenimento del tessuto, permette l'affilamento della lama tagliente, durante il normale uso della forbice, garantendo un'uniformità di taglio costante nel tempo ed una durata di gran lunga superiore alle normali forbici chirurgiche.

Super-cut scissors:

The innovative scissors of the Super-cut series are identified by the gilding on a single handle. The special design of the tips, with one razor-sharp blade, allows for very precise cuts in the tissues. The other blade, notched for a better hold of the tissue, ensures a uniform incision, constant in time and allows for the sharpening of the cutting blade during normal use, thus providing a longer life span compared to standard surgical scissors.

ORAL URGENT TREATMENT

Il kit O.U.T (Oral Urgent Treatment) è il set di pinze da estrazione universali Lascod specifiche per il trattamento orale urgente. Questo è il nostro umile contributo a tutti i professionisti coraggiosi che eseguono estrazioni in situazioni di emergenza.

The O.U.T Kit is Lascod set of universal forceps specifically designed for oral urgent treatment. This is our humble contribution to all brave professionals who performs extractions in emergency situations.

Se "Where There Is No Dentistry"* (di Murray Dickson, 1983) è ampiamente considerato il Manuale di riferimento per specifici progetti di odontoiatria sociale, oggi l'Organizzazione Mondiale della Sanità sostiene attivamente programmi con il nome OUT (Trattamento Urgenza Orale) per la creazione di protocolli di emergenza dentale. Lascod sta sviluppando adesso anche strumenti dentali compatibili con tali protocolli in modo che possano essere utilizzati ovunque ci sia la necessità di un trattamento odontoiatrico d'emergenza (incidenti stradali o di lavoro), nonché in aree remote ed in odontoiatria di campo. Il kit O.U.T. può essere molto utile anche nei casi di assistenza odontoiatrica domiciliare, alle persone disabili o non trasportabili.

If "Where There Is No Dentistry"* (by Murray Dickson, 1983) is widely considered the Reference Manual for specific social dentistry projects, nowadays the World Health Organization is actively supporting programs named OUT (Oral Urgency Treatment) for the creation of dental emergency protocols. Lascod is now developing also dental instruments compatible with such protocols and to be used wherever there is the necessity of an urgent treatment (traffic or work accidents) as well as remote areas and field dentistry. The O.U.T. Kit can be very useful also in cases of home care in dentistry necessary to disabled or not transportable people.

La particolare forma ergonomica rende queste pinze estremamente maneggevoli. L'inclinazione e le punte sono state studiate per ottimizzare la presa di ogni elemento dentario nelle due arcate.

The special ergonomic design makes these pliers extremely handy.

The inclination and the tips are designed to maximize the grip of any tooth in the two dental arches.

Il Kit O.U.T. (ZKS001) è perfettamente trasportabile grazie al fatto di utilizzare tre sole pinze adattabili ad ogni tipo di estrazione.

LASCOD O.U.T. (ZKS001) basic kit responds efficiently to the need of portability with just three forceps for any extraction.

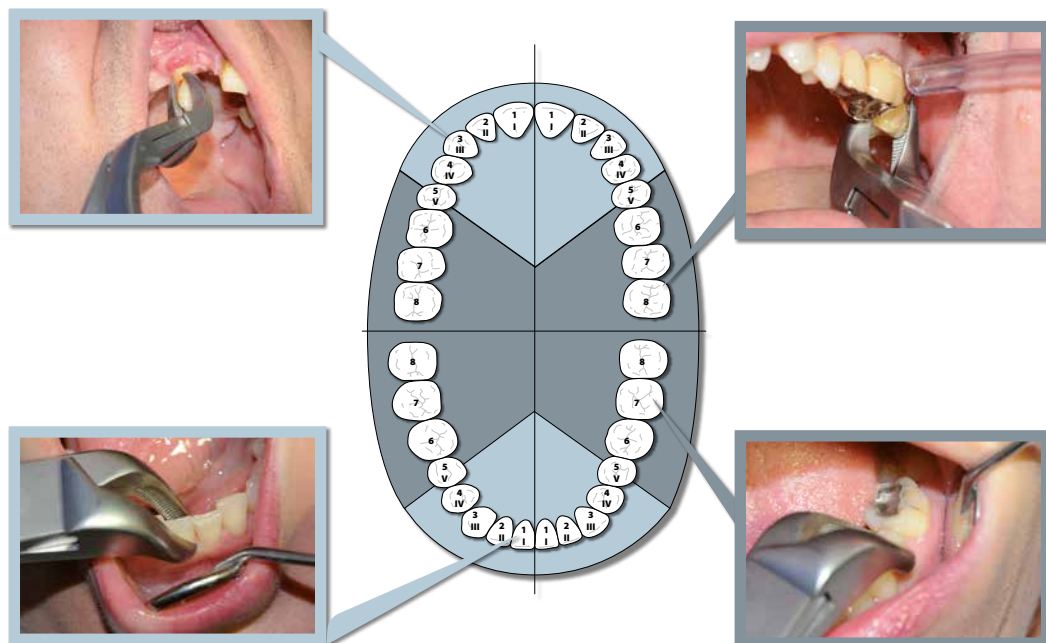

UNIVERSALI

Con solo tre pinze è possibile fare estrazioni di ogni singolo elemento dentario sia nell'arcata superiore che inferiore, sia sinistra che destra.

UNIVERSAL

With only three forceps you can extract any tooth in the upper or lower arch, and in the upper and lower front, on the left or right side.

Attivate il codice QR per visionare il filmato.

Scan QR code and watch the video.

IGIENE ASSOLUTA

Il motto Lascod è Igiene Assoluta ed il Kit O.U.T. con il manico delle pinze sabbiato (e non zigrinato) oltre a garantire un'ottima tenuta permette una ancor più facile pulizia dello strumento. Inoltre la pinza può essere smontata in modo da essere pulita e sterilizzata più facilmente in qualsiasi situazione.

ABSOLUTE HYGIENE

LASCOD MOTTO is Absolute Hygiene and the O.U.T. KIT sand blasted handle surface guarantees firm grip and easy to clean surface. The forceps can be disassembled to optimize cleaning and sterilization in extreme field situations.

Dr. M. Conti

La leva che presentiamo è il frutto di un'esperienza pluridecennale maturata presso l'unità operativa di chirurgia maxillo – facciale dell'Università di Firenze su di una casistica di migliaia e migliaia di interventi di chirurgia estrattiva avanzata.

The root elevator we are introducing is the result of multiyear experience accrued at the maxillofacial surgery unit of the University of Florence during thousands and thousands of advanced surgical extractions.

Dott. Massimo Conti

Laureato in Medicina e Chirurgia, perfezionato in Chirurgia Orale, specializzato in Chirurgia Odontostomatologica.

Da oltre 27 anni presso la Chirurgia Maxillo Facciale di Firenze dove si è dedicato prevalentemente ad interventi di Chirurgia Orale ambulatoriale.

Solo riguardo alla chirurgia estrattiva complessa ha al suo attivo oltre 5800 interventi.

Ha insegnato alla scuola di specializzazione in chirurgia orale all'Università di Firenze come titolare della cattedra di Chirurgia endodontica; docente al corso Master annuale avanzato di Chirurgia Orale e stato tutor di riferimento per molti studenti.

Oltre a vari lavori scientifici e partecipazione in qualità di relatore a Convegni e Congressi ha recentemente pubblicato il testo illustrato sulla Chirurgia degli ottavi per la casa editrice Masterbooks di Firenze.

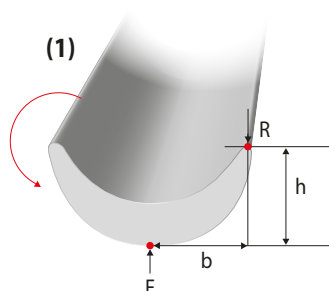

He holds a degree in Medicine and Surgery, perfected in oral surgery, with a specialisation in Dental Surgery.

For more than 27 years he has been working at the Maxillofacial Surgery Unit of Florence where he has mainly been involved in outpatient oral surgery.

In the field of extractive surgery alone he has carried out more than 5,800 operations.

He taught at the specialisation school in oral surgery of the University of Florence, holding the chair of Endodontic Surgery: he has been a lecturer in the annual advanced master in Oral Surgery and a reference tutor for a great number of students.

In addition to various scientific papers and participation as a speaker at conventions and congresses, he has recently published an illustrated text on octave surgery for the publishing house, Masterbooks of Florence.

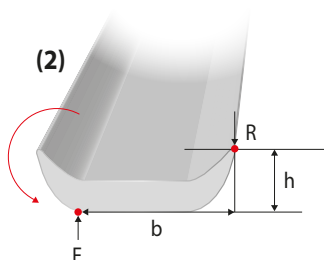

Se osserviamo la sezione della punta lavorante della maggior parte delle leve usualmente in commercio notiamo che questa presenta una forma ad "arco di cerchio" progettata per contornare la radice del dente, dando per scontato che vi sia uno spazio periodontale sufficiente per potervi inserire la leva.

L'uso di questa forma dà per scontato che vi sia uno spazio periodontale sufficiente per potervi inserire la leva. Se questo però è vero per le estrazioni più semplici non lo è affatto per le estrazioni più complesse dove, spesso, l'anatomia è stravolta dall'osteotomia e dall'odontotomia. Talvolta il fulcro ricercato non è neppure sull'osso ma all'interno del dente stesso, come nel caso di un solco odontotomico fatto intenzionalmente per separare il dente in due o più parti. E' in questi spazi che si deve impegnare la parte attiva della leva la quale dovrà essere usata con movimenti rotazionali sul proprio asse e solo più raramente come leva di 1° genere (v. estratto testo Conti Massimo "Chirurgia degli Ottavi" p. 157 – 164 ed. Masterbooks 2015)*

If we observe the section of the working tip of the majority of root elevators found on the market we can see how they have a "circular arc" shape designed to follow the contours of the root of the tooth, taking it for granted that there is sufficient periodontal space for introducing the elevator.

*The use of this shape assumes that there is sufficient periodontal space for being able to insert the elevator. While this is true for simple extractions it is not the case for more complex extractions where, due to the anatomy it is often distorted by the osteotomy and odontotomy. At times the fulcrum searched for is not even in the bone, but instead, inside the tooth itself, as in the case of an odontotomy fissure created intentionally in order to divide the tooth into two or more sections. It is inside these spaces that the active part of the elevator must be engaged and used with rotational movements on its own axis, and only very rarely used as a first-class elevator (see extract of text by Conti Massimo "Chirurgia degli Ottavi" p. 157 – 164 Ed. Masterbooks 2015)**

La forma della sezione della punta lavorante che proponiamo è studiata per incunearsi meglio e una volta che questa si è impegnata dovrà essere utilizzata con piccoli movimenti rotazionali lungo l'asse maggiore dello strumento. Il dorso spianato della parte attiva riduce l'altezza (h) spostando il punto di fulcro (F) ad un'estremità e consentendo una mobilizzazione più efficace e pronta rispetto al dorso semicircolare che invece presenta il fulcro centrale. Le alette vive della parte ventrale aumentano il grip di presa sul dente.

The shape of the section of the working tip that we are now proposing is designed to wedge itself inside better and once it is engaged it must be used with small rotational movements along the main axis of the instrument. The flattened back of the active part reduces the height (h) thus shifting the point of the fulcrum (F) to the end and in this way enabling readier and more efficient mobilising compared to the semicircular back that instead has the fulcrum in the middle. Moreover, the moveable fins of the ventral part increase the grip on the tooth.

Il rapporto tra lunghezza del manico e lunghezza dello stelo è tale da non avere zone d'ombra da parte della mano dell'operatore anche per cavità ossee profonde chirurgicamente indotte. Sono queste le considerazioni che ci hanno motivato a mettere a disposizione dell'odontoiatra questa nuova leva con l'augurio che possa essergli d'aiuto nella pratica quotidiana della sua attività lavorativa.

The relationship between the length of the handle and the length of the stem makes it possible to avoid areas of shadow created by the operator's hand, also for deep bone cavities induced surgically. These are the considerations that have motivated us to make this new elevator available to dentists in the hope that it will be a helpful aid in their daily practice.

Spatole PK THOMAS:

Gli strumenti per modellare vengono fabbricati con torni a controllo numerico gestiti da computer.

La serie completa di spatole per modellazione in cera PK THOMAS vengono proposte con manico in alluminio anodizzato e colorato (verde, oro, bleu, rosso, acciaio) per facilitare l'identificazione in laboratorio.

Il manico in alluminio di diametro maggiorato (8 mm) rende lo strumento particolarmente leggero, quindi sensibile e preciso, caratteristiche di fondamentale importanza per riprodurre la corretta morfologia anatomica del dente naturale.

PK THOMAS spatulas:

PK THOMAS spatulas: Carving instruments are manufactured by Computer Numerical Control (CNC) lathes.

The complete set of PK THOMAS spatulas used for waxing is offered with a colored handle (green, gold, blue, red, steel) made of anodized aluminum to facilitate identification in the dental laboratory. The aluminum handle with a larger diameter (8 mm) makes the instrument lightweight, sensitive and precise, all important features to reproduce the correct anatomical morphology of natural tooth.

Tissue plier cm. 15 - curved # 32L Semken-Taylor	ZFR046	S/21
Tissue plier cm. 15 straight # 31L Semken-Taylor	ZFR045	S/21
Tissue plier cm. 16 - angulated # 90C De Bakey vascular	ZFR055	S/21
Tissue plier cm. 16 - straight # 90 De Bakey vascular	ZFR054	S/21
Tissue plier cm. 17,5 # 50 C Gerald - curved	ZFR051	S/21
Tissue plier cm. 17,5 # 50 Gerald - straight	ZFR049	S/21
Tissue plier cm. 17,5 # 51C Gerald - curved (1x2)	ZFR053	S/21
Tissue plier cm. 17,5 # 51 Gerald - straight (1x2)	ZFR052	S/21
Tissue pliers cm. 12 - mm. 1.5 # 41 Adson	ZFR030	S/20
Tissue pliers cm. 12 - mm. 1.5 # 42 Adson 1x2	ZFR032	S/20
Tissue pliers cm. 12.5 - curved # 32 Semken-Taylor	ZFR036	S/21
Tissue pliers cm. 12.5 - curved # 34 Semken-Taylor 1x2	ZFR038	S/21
Tissue pliers cm. 12.5 - straight # 31 Semken-Taylor	ZFR035	S/21
Tissue pliers cm. 12.5 - straight # 33 Semken-Taylor 1x2	ZFR037	S/21
Titanium nitride carver hollow handle 8mm # 1 IP Interproximal	ZFH090	R/7
Titanium nitride carver hollow handle 8mm # 2IPOA Interprox.o.a.	ZFH091	R/7
Titanium Nitride composite instr.hollow handle 8mm # G4 Goldstein	ZFG203	R/6
Titanium Nitride composite instrument - thin tips # 6	ZFG292	R/6
Titanium Nitride composite instrument - thin tips # 9	ZFG293	R/6
Titanium Nitride composite instrument # 10	ZFG105	R/6
Titanium Nitride composite instrument # 3R	ZFG104	R/6
Titanium Nitride composite instrument # 4	ZFG090	R/6
Titanium Nitride composite instrument # 5	ZFG091	R/6
Titanium Nitride composite instrument # 6	ZFG092	R/6
Titanium Nitride composite instrument # 9	ZFG093	R/6
Titanium Nitride composite instrument # F4 Felt	ZFG094	R/6
Titanium Nitride composite instrument # G4 Goldstein	ZFG103	R/6
Titanium Nitride composite instrument hollow handle 8mm # 10R	ZFG205	R/6
Titanium Nitride composite instrument hollow handle 8mm # 3R	ZFG204	R/6
Titanium Nitride composite instrument hollow handle 8mm # 4	ZFG190	R/6
Titanium Nitride composite instrument hollow handle 8mm # 5	ZFG191	R/6
Titanium Nitride composite instrument hollow handle 8mm # 6	ZFG192	R/6
Titanium Nitride composite instrument hollow handle 8mm # 9	ZFG193	R/6
Titanium Nitride composite instrument hollow handle 8mm # F4 Felt	ZFG194	R/6
Titanium Universal curette # L1/2 Langer	ZFM685	P/7
Titanium Universal curette # L3/4 Langer	ZFM686	P/7
Titanium Universal curette # L5/6 Langer	ZFM687	P/7
Tungsten carbide gum scissors cm. 11.5 - curved # 18TC Iris	ZFV021	S/13
Tungsten Carbide gum scissors cm. 11.5 - straight # 17TC Iris	ZFV020	S/13
Tungsten Carbide gum scissors cm. 13 - curved # 16TC Goldman-Fox	ZFV023	S/13
Tungsten Carbide gum scissors cm.13 # -straight 16RTC Goldman-Fox	ZFV022	S/13
Tungsten Carbide needle holder cm. 14 # OH14T Olsen-Hegar	ZFW014	S/16
Tungsten Carbide needle holder cm. 15 # CW15T Crile-Wood	ZFW011	S/16
Tungsten Carbide needle holder cm. 15 # MR15T Mini-Ryder	ZFW013	S/16
Tungsten Carbide needle holder cm. 16. # MH16T Mayo-Hegar	ZFW010	S/16
Tungsten Carbide needle holder cm. 18 - curved # J18CT Jacobson	ZFW022	S/17
Tungsten carbide needle holder cm.14 # M14T Mathieu	ZFW016	S/16
Tungsten carbide needle holder cm.14 curved # CV14CT Castroviejo	ZFW020	S/17
Tungsten carbide needle holder cm.14-straight #CV14RT Castroviejo	ZFW019	S/17

Tungsten Carbide needle holder cm.18 - straight # J18RT Jacobson	ZFW021	S/17
Tweed loop forming plier	ZLH503	O/3
Two spare mallet teflon ends for surgical mallet ZFP021	ZFP031	S/3
