

# tcs FLEXIBLE DENTURE ADVANCED WORKSHOP

**The one day course costs £180 including VAT per person and includes lunch and 7 hours of verifiable CPD. Discounts available for 2 or more people.**

This course is for persons that are already familiar working with thermo -plastics but would like additional training on repairs, additions and difficult cases. We will begin by discussing all aspects of design and then prepare the teeth for retention before waxing up using a difficult case provided. If you prefer you can bring your own case along to set up (please advise in advance). We will then demonstrate how to add a tooth to an existing denture and then re-inject using the tcs manual system. Using a tcs injected denture we will also practice repairing and adding material using the hot air welder, and then move on to demonstrating and practicing the finish and polishing stages.

## Course Outline

- Start time 9.30am
- Discussing all aspects of design and processing
- Preparing teeth for retention using clear acrylic teeth
- Hands on waxing up and blocking out using a difficult case
- Demonstrating an addition to an existing tcs denture
- Repair using the hot air welder
- Demonstrate and practice the finish and polishing stage
- How to care for your tcs unbreakable partial
- Conclusion Questions/Answers
- Finish 5.00pm
