

Our largest ever prize fund

Join us this holiday season for our biggest ever competition. Not just one prize but 7 prizes!
Over six Fridays and one Thursday at 5pm we will give away one of these prizes and then announce the prize for the following week. Over seven weeks we will be giving away prizes in a fund worth thousands of pounds and includes a 4K TV, DeWalt tool sets, Apple iPad Pro and much, much more.

To be in with a chance of winning one of these incredible prizes, all you have to do is buy something from this offer sheet and every item purchased will represent one entry. In addition, to thank our loyal and ever expanding customer base, you will be given an entry for every order you place with us during December and January.

For full terms and conditions please visit our website – www.whwplastics.com

We will be closing on Friday December 21st 2018 until Wednesday January 2nd 2019.

Many thanks for your business and continual support in 2018.

From everyone at WHW we wish you a Merry Christmas, Happy Holiday and prosperous New Year!

NEW

Lightweight and durable articulator with integrated magnetic system that allows easy insertion and removal. The alloy coating protects against corrosion and the articulator is supplied with 2 magnets and 4 retention discs.

51MAL

Buy any pack for only
£17.95

The EKOM DK50 2V/M compressor delivers clean, dry, oil free compressed air. This low noise, compact compressor delivers over 105 L/min @ 6 bar pressure and is continuously rated.

Key features:

- * 2 year warranty
- * All cooling/drying occurs upstream of the tank, which ensures air within the tank is completely clean and dry, ready for use
- * 25ltr internally coated tank
- * -40 pressure dew point
- * Extremely quiet @ 53dba with cabinet – designed to be located within the lab, fitted under the workbench
- * 100% duty rated Siemens motor

THE IMPORTANCE OF CLEAN AIR

The quality of compressed air is often overlooked. The majority of compressors on the market are unable to provide EKOM's level of air quality.

In some applications the air quality is critical, which is why the EKOM compressor with desiccant dryer/filter is a perfect compact solution.

There are many advantages of using better quality compressed air in your dental mills. The most obvious being improved results due to less impurities being passed through the line such as dust and water vapour.

Full installation and servicing programmes are available upon request.

DUST EXTRACTION DRAWER

Proudly made by WHW for over 30 years, the efficient dust drawer can be installed in most benches within a matter of minutes. A high powered 310 cfm, centrifugal fan with high and low speed settings will ensure that the laboratory is kept clean, whilst optimising the space available. The filtration system offers longevity and cost efficiency and we even produce a precious metal recovery filter. Where aesthetics are important, the drawer front can be replaced so that it integrates seamlessly into the laboratory.

DENTSPLY SIRONA LUCITONE® CLEAR POUR

Lucitone® Clear Pour is the newest addition to the market leading and trusted Lucitone® family of denture base acrylics.

Designed for various applications, the new acrylic gives you a clear, no tint pourable solution for night guards, splints, and other dental appliances.

Optimised flow characteristics reduce porosity to nearly non-observable levels, which results in a very aesthetic dental appliance. Save time over other clear, heat-cure acrylics and enjoy a 3-minute pour time, excellent colour stability and easy finishing and polishing.
