

SHERAscan io

Shera Digital and WHW are delighted to bring to the market the intraoral scanner you have been waiting for. With an incredibly high definition range of between 5µm and 50µm, combined with multiscan imaging technology, the open source stl files created are unparalleled. With smooth surfaces and defined edges, the scans represent a quality that can be used for any indication.

Our exceptional price includes everything you need. We will install your system, train you and your colleagues and give you all the support you need for the first 12 months.

- Fast scanning time (a trained user can scan a full arch in under 60 seconds)
- 10 measuring cameras and 5 LEDs
- Creates open STL files
- Powder free, ergonomic heated hand piece
- HP size of 198 mm and only 105g
- LED lights and acoustic aids guide you to ensure scan quality
- Wireless enabled
- Voice and gesture control
- Integrated PC with Windows 10, 64 bit, Core i7, 16 GB RAM
